#### Paula Bellón

Speech Therapist, PhD

Paula holds a Bachelor's and Master's degree in Speech and Language Therapy, and completed her PhD in Psychology at the Complutense University of Madrid.

Her professional approach -both in clinical practice and research- focuses on multilingualism, especially in the language and cultural dynamics of multilingual families where children might have typical or atypical development.

She has experience working with multilingual children as a speech therapist, and currently provides counseling and training sessions for families and professionals in clinical and educational settings, including therapists and teachers.

Her goal is to build bridges linking current evidence on multilingualism with professional practice, ensuring that multilingual children and their families receive the support they need.

Our most valuable asset is our team of highly qualified and experienced professionals.

Our aim is to support children, adolescents, and adults to enhance their abilities and skills. We place a special emphasis on self-awareness, discovering one's own resources and coping mechanisms, as well as on emotional wellbeing.
